Dear Peter,

**FORMAL NOTIFICATION: COMPLETION OF RECTIFICATION WORKS -  
EXPLORATION LICENCE 3258**

I refer to the *Closure Report (Independent Verification of Rectification Works EL3258, Parsons Brinkerhoff, 16 February 2008)* submitted by the lead independent person on 17 February 2008 and letter dated 16 February 2009 with attached ARPANSA dose report as requested in PIRSA's Formal Notification dated 20 August 2008

PIRSA has now completed a final assessment of the rectification works conducted between 17 November and 22 December 2008 against criteria documented within the Formal Notification dated 20 August.

I wish to advise that PIRSA has found the rectification works have been undertaken in accordance with the Rectification Plan approved 11 August 2008 and the Formal Notification dated 20 August 2008. I note that all rectification works have been satisfactory completed except for seeding of the rehabilitated sites. The *Closure Report* will now be made publically available via the PIRSA Minerals website.

The Minister for Mineral Resources Development previously requested a Bond totalling \$157,000 covering the above rectification works. The Bond was lodged by Marathon Resources with PIRSA on 9 July 2008. The Bond will be returned once your company provides written confirmation that seeding of rehabilitated sites has been completed when more favourable seasonal conditions permit.

Please contact me if you require any further clarification on this matter.

Yours sincerely

**DR EDWARD TYNE**  
**DIRECTOR MINERAL RESOURCES**
