16. The statutory objectives of the *Fisheries Management Act 2007* are set out in section 7:

An object of this Act is to protect, manage, use and develop the aquatic resources of the State in a manner that is consistent with ecologically sustainable development and, to that end, the following principles apply:

- (a) proper conservation and management measures are to be implemented to protect the aquatic resources of the State from over-exploitation and ensure that those resources are not endangered;
- (b) access to the aquatic resources of the State is to be allocated between users of the resources in a manner that achieves optimum utilisation and equitable distribution of those resources to the benefit of the community;
- (c) aquatic habitats are to be protected and conserved, and aquatic ecosystems and genetic diversity are to be maintained and enhanced;
- (d) recreational fishing and commercial fishing activities are to be fostered for the benefit of the whole community;
- (e) the participation of users of the aquatic resources of the State, and of the community more generally, in the management of fisheries is to be encouraged.

Your application will be assessed against these objectives and must be consistent with fisheries management and protection arrangements that apply under the Act. Please provide any additional information that may support your application, including any social, economic or biological considerations. In particular, please include information to demonstrate how approval of your application would further the objectives of the *Fisheries Management Act 2007*:
