

NEWCASTLE DISEASE VACCINATION PROGRAM
MEAT CHICKENS
STANDARD OPERATING PROCEDURES

IMPORTANT NOTE

Titres are defined as adequate if, from 4 weeks post-vaccination the mean HI titre of the flock is at least 2^3 (1/8).

| | | |
|--|------------|---------|
| Preferred program | 7–14 days* | Live V4 |
| Alternative program (allowed only on provision of adequate evidence to prove equivalence to the preferred program) | Day-old | Live V4 |

*If the birds are older than 14 days at the time that vaccination becomes compulsory in an area, vaccinate with live V4 immediately, unless the birds have been previously vaccinated or are due for processing within 7 days.
