# Introduction

## Purpose of the Cost Recovery Implementation Statement (CRIS)

This Cost Recovery Implementation Statement (CRIS) provides information on how the Department of Primary Industries and Regions (PIRSA) implements cost recovery activities associated with the ecologically sustainable development (ESD) of the South Australian aquaculture industry- Abalone (Aquaculture) Sector.

PIRSA Fisheries and Aquaculture's Cost Recovery Policy considers the Commonwealth Department of Finance and Administration's '*Australian Government Cost Recovery Guidelines report*' (2014), in addition to the Productivity Commission's '*Cost recovery by government agencies: inquiry report*' (2001), to ensure consistency with National Guidelines.

## Description of the Activity

PIRSA Fisheries and Aquaculture's core business is the ecologically sustainable development (ESD) of the South Australian aquaculture industry, through the administration of the *Aquaculture Act 2001* (the Act). Key activities include the development, implementation and review of legislative and policy frameworks for the South Australian aquaculture industry. Although the management of aquaculture activities in South Australia is undertaken predominantly through implementation of the Act, there are a number of other related State, national and international legislative instruments and policy initiatives that also apply to the activities undertaken by PIRSA Fisheries and Aquaculture, which have been explained throughout this document.

The costs of managing aquaculture activities in South Australia are partially recovered from industry. The PIRSA Cost Recovery Policy determines that 'Cost Recovery' broadly encompasses fees and charges related to the provision of government goods and services, which includes regulatory and information services.

Activities of PIRSA Fisheries and Aquaculture are grouped into the following nine key programs.

1. Resource Planning.
2. Aquaculture Leasing and Licensing.
3. Legislation.
4. Compliance.
5. Aquaculture Systems.
6. Aquatic Animal Health.
7. Environmental Monitoring and Management.
8. Program Management and Administration.
9. Other Aquaculture Activities.

These key programs ensure consistent development and management of each sector of the aquaculture industry.

This document describes the programs, activities and associated costs required to develop and manage the remaining leases and licences in the Abalone sector. The costs of PIRSA Fisheries and Aquaculture associated with administering Abalone related activities are described in this document using an activity-based-costing approach.

# Summary Table

2021-22 (\$)	Activity	2022-23 (\$)
2,814	Resource Management and Planning*	2,871
9,513	Program Management and Administration*	9,703
18,088	Aquaculture Leasing and Licensing*	18,450
3,011	Legislation*	3,071
0	Compliance**	0
3,264	Aquaculture Systems*	3,329
2,797	Aquatic Animal Health*	2,853
2,653	Environment and Resource Management*	2,706
826	Other Activities*	842
<b>42,965</b>	<b>Total ***</b>	<b>43,825</b>

\* The indexation rate of 2% has been applied to the 2022-23 program costs, which is consistent with Department of Treasury and Finance’s forward estimates for the annual fees and charges indexation rate.

\*\* Please note the cost of compliance is currently \$0 due to the lack of activity in the sector, as activity increase in the future considerations of these costs will need to be included in the management of the sector.

\*\*\* Please note all dollar values have been rounded to the nearest dollar figure.

	2021-22	2022-23
Abalone Lease Fee	5,729	<b>4,382</b>
Abalone Licence Fee	8,593	<b>6,574</b>

# Resource Planning

## Program Summary

Resource Planning captures PIRSA Fisheries and Aquaculture's activities relating to the development of new, and review of, existing statutory aquaculture zone policies and identification of areas of State waters that are suitable for future marine aquaculture development activity. This program covers input to the development of State and national legislative and policy initiatives, which have the potential to impact aquaculture. Aquaculture zone policies follow an Ecologically Sustainable Development (ESD) approach that covers environmental, social and economic considerations relating to aquaculture activity.

This requires an ongoing review and collation of technical information as well as consultation with all stakeholders, industry, government and community. This program also ensures that all aquaculture zone policies are consistent with other South Australian, national and international legislative and policy requirements and ensures the interests of aquaculture operators are represented in broader policy and planning frameworks.

## Objectives

To provide certainty to aquaculture operators and other key stakeholders through establishing and maintaining specified areas of State waters as zones designated for the purposes of marine aquaculture activity and ensuring the interests of aquaculture operators are represented in broader policy and planning frameworks.

## Activities

The Aquaculture Tenure Allocation Board (ATAB) established by the Act provide high level strategic advice and informed recommendations for tenure allocation, respectively, to PIRSA Fisheries and Aquaculture and the Minister. PIRSA Fisheries and Aquaculture provides policy related information, administrative and financial support for the ATAB.

There are currently ten (10) Aquaculture Policies that accommodate the farming of abalone species in the following locations: Cape D'Estrees, Streaky Bay, Smoky Bay, Anxious Bay, Coffin Bay, Lower Eyre Peninsula, Port Neill, Fitzgerald Bay, Tumbly Bay and Eastern Spencer Gulf.

PIRSA Fisheries and Aquaculture undertakes investigation of further aquaculture zones and reviews existing zones, which could facilitate further abalone aquaculture (e.g. review of Lacepede Bay aquaculture zone policy to enable abalone farming, and review of Lower Eyre Peninsula aquaculture zone policy to expand abalone farming).

The following four (4) key activities are undertaken by the Resource Planning Program to establish and review zone policies for abalone aquaculture activities in South Australia. The zone policy development process requires an integrated approach to development of each aquaculture zone, which involves facilitating broad participation of stakeholders in planning processes.

### **1. Strategic Resource Planning and Management (Part 4; Sections 10 – 14 of the Act)**

Strategic planning and management to meet the requirements of South Australia's expanding aquaculture industry includes a number of policy related activities prescribed by the Act. These include:

- New zone policy development, existing zone policy review and extension of an existing zone policy is undertaken to ensure future zone policy development or amendment continues to meet the requirements of South Australia's aquaculture industry. This includes the identification of potential future areas appropriate for the expansion of the Subtidal Abalone industry, including finalization and implementation of the *Aquaculture (Zones - Lower Eyre Peninsula) Policy 2013* review. This process informs planning for scientific technical investigations.
- Ongoing monitoring and auditing of zone policy performance is required to plan advertisement of tenure and ensure movement of sites and change of species within aquaculture zones and sectors do not compromise the allocation limits of the policy. This ensures transactions can be assessed in an efficient manner.
- Development of zone policy templates and procedures to ensure the zone policy development process is managed from a quality management perspective and remains efficient.
- Continued implementation of the Standard Lease and Licence Conditions Policy in 2022-23 across all aquaculture sectors.
- The development and implementation of internal policies/guidelines that flow from amendments to the Act and *Aquaculture Regulations 2016* (Regulations), e.g. Public Call guidelines for zoned areas, Aquaculture Tenure Allocation Board guidelines for how lease and licence applications are to be assessed, and Sector-based Strategies.

## **2. Zone Policy Review (Part 4; Sections 10 – 14 of the Act)**

Existing zone policies (e.g. Lower Eyre Peninsula) are reviewed on a periodic basis to ensure they remain consistent with industry practice, legislative requirements, and technical research and they appropriately address industry development needs and broader public concerns.

## **3. Zone Policy Development for New regions or Emerging Sectors (Part 4; Sections 10 – 14 of the Act)**

Zone policies are developed for new regions and emerging aquaculture sectors to ensure a framework exists to provide for ESD of aquaculture activities and to ensure appropriate levels of access security exist for industry participants. Zone policies also provide for a level of public accountability of the aquaculture activities being undertaken inside the zone boundaries.

## **4. Provide Input to, and Alignment With, Broader State and National Policy Development Activities and Planning Frameworks that Impact on South Australian Aquaculture Zone Development Processes (Sections 8 and 9 of the Act)**

PIRSA Fisheries and Aquaculture provides input to a range of State and Commonwealth Government environmental and conservation initiatives, to ensure aquaculture zone development objectives and aspirations are adequately taken into account and factored into broader conservation policy development. As part of this activity, PIRSA Fisheries and Aquaculture regularly engages with the South Australian Department of Environment and Water (DEW), the Commonwealth Department of Agriculture, Water and the Environment, the Environment Protection Authority (EPA), the Department for Infrastructure and Transport (DIT), the Planning and Land Use Services Division of the Attorney-General's Department (PLUS-AGD), Local Councils, and South Australian Landscape Boards.

Under section 11(3) (a) of the Act, PIRSA Fisheries and Aquaculture is required to further the objectives of the *Marine Parks Act 2007*. PIRSA will continue to consult with DEW in respect to aquaculture zoning and licence applications in marine parks.

PIRSA Fisheries and Aquaculture will continue to participate in the implementation of the *Landscape South Australia Act 2019*. This will include input into subsequent regulations and regional plans that will be required to be reviewed for consistency to the new legislative requirements and as they relate to aquaculture development.

PIRSA Fisheries and Aquaculture will continue to participate in Planning and Design Code amendments as they are reviewed under the *Planning, Development and Infrastructure Act 2016*. Planning tools, and policies are considered to ensure adequate representation of aquaculture development. PIRSA Fisheries and Aquaculture will also continue to participate in the implementation of the *Planning, Development and Infrastructure Act 2016*, to ensure that the new planning framework supports both marine-based and land-based aquaculture development in the State.

PIRSA Fisheries and Aquaculture participates in consultation on referrals for development applications and aquatic activity licences that could impact on the aquaculture industry, including major developments such as ports and other non-major developments such as dredging activities.

PIRSA Fisheries and Aquaculture ensures aquaculture zone policies and planning frameworks adhere to and are consistent with South Australian and national development framework agreements, including:

- a. National legislation and policy frameworks, including: the *Environment Protection and Biodiversity Conservation Act 1999* (Cth), *Native Title Act 1993* (Cth), *Fisheries Management Act 1991*(Cth), *Historic Shipwrecks Act 1976* (Cth), and the *National ESD Reporting Framework: The 'How to' Guide for Aquaculture (2004)*.
- b. State legislation and policy frameworks principally: *Environment Protection Act 1993*, *Coast Protection Act 1972*, *National Parks and Wildlife Act 1972*, *Fisheries Management Act 2007*, *Livestock Act 1997*, *Crown Land Management Act 2009*, *Heritage Places Act 1993*, *Historic Shipwrecks Act 1981*, *Wilderness Protection Act 1992*, *Harbors and Navigation Act 1993*, *Aboriginal Heritage Act 1988*, *Marine Parks Act 2007*, *Native Vegetation Act 1991*, *Landscape South Australia Act 2019*, *Agricultural and Veterinary Chemicals (Control of Use) Act 2002* and *Regulations 2004*, *Environment Protection (Water Quality) Policy 2015*.

# Aquaculture Leasing and Licensing

## Program Summary

Aquaculture Leasing and Licensing provides a range of core services related to the processing and management of aquaculture leases and licences. For example, the program assesses, grants, monitors and varies, new and existing leases and licences in accordance with the Act, with evidence-based consideration of factors relating to social, environmental and economic sustainability. Functions of these services include case management, referrals to other agencies, ESD assessment of applications, new lease and licence applications, and renewals or variations to existing leases and licences

## Objectives

To maintain and administer a licensing framework that enables management of aquaculture activities in accordance with the Act.

## Activities

### 1. Management of leases and licences (Pursuant to the Act and Regulations)

PIRSA Fisheries and Aquaculture manages a number of core administrative processes and procedures that provide the basis of leasing and licensing services for the aquaculture industry. The core processes are detailed below.

#### *Case management*

- The Case Management process is used by PIRSA Fisheries and Aquaculture to manage individual lease and licence transactions to reduce complexity for the customer and provide a single point of entry for industry when developing or changing aquaculture operations. Individual transactions go through several steps for each type of application, relating to notifications, approvals, assessments and administrative steps. Case Managers ensure that each step is achieved, and that the given transaction is finalised in an accurate and timely manner, including referrals and follow up with external government agencies. Case Management simplifies the government approvals process for aquaculture development and therefore supports red-tape reduction and customer service objectives.
- PIRSA Fisheries and Aquaculture has a working framework to ensure regulatory responsibilities for ESD under the Act are met during lease and licence assessment processes through the application of ESD Risk Assessment Guidelines, which align with national best practice frameworks.

#### *Sector specific and general problem solving*

- PIRSA Fisheries and Aquaculture work together with industry and other government departments to solve specific issues related to new developments and changes to existing lease and licence sites, to ensure that community values are upheld, and all other relevant government legislation is adhered to, such as the *Environment Protection Act 1993*. Generally, the Case Manager will work closely with applicants to ensure their proposals align with these interests and requirements as the application progresses through each step.

- PIRSA Fisheries and Aquaculture receive requests from lease and licence holders for variations of licence conditions or lease arrangements. The Case Manager processes requests using a pragmatic approach, based on the implications and timeliness of the question or issue to be considered.
- Regulations and policies administered through the *Fisheries Management Act 2007* are managed as a part of aquaculture leasing and licensing, in particular, permits for the collection of seedstock or broodstock, and for the release of aquatic resources.

#### *Licence appeals and public submissions*

- PIRSA Fisheries and Aquaculture administers a legally compliant appeals procedure in accordance with Part 9 of the Act. This process provides unsuccessful applicants with the right to appeal against decisions. Case Managers actively work to establish an acceptable outcome among all parties rather than not granting a licence or licence variation application.
- Whilst not considered a formal appeal under Part 9 of the Act, submissions can be made by external stakeholders or members of the public as a result of the public notification of the proposed grant of a lease and licence. Upon receiving a submission, PIRSA Fisheries and Aquaculture must consider and respond to all submissions as part of the application process. This information becomes critical in the ESD assessment conducted for each application.

#### *Manage audit programs*

- PIRSA Fisheries and Aquaculture periodically review application forms and processes as well as ESD templates with relevant external agencies to ensure the correct information is collected and to increase efficiency in application assessments.
- PIRSA Fisheries and Aquaculture maintain internal lease and licence audit functions, including auditing procedures (flowcharts, checklists and manuals) and performance criteria relating to leases and licences to ensure accuracy of data on leases and licences and therefore the quality management of registrations and applications by the Case Manager.
- Insurance and indemnity conditions in aquaculture leases are in place to mitigate risks to the Minister from a loss to a third party as a result of an authorised aquaculture activity, or from the rehabilitation costs of an aquaculture site if it is abandoned. PIRSA Fisheries and Aquaculture seeks to ensure appropriate instruments are used to reduce the possibility of sites being abandoned.
- Maintenance of audit functions in relation to insurance and indemnity for aquaculture leases, including requesting evidence of cover from lease holders as required.
- PIRSA Fisheries and Aquaculture maintains a process and works with individual lease and licence holders and industry representatives to ensure rehabilitation of abandoned sites.
- PIRSA Fisheries and Aquaculture provides a process for the payment of lease and licence fees through instalments and implements a debt recovery process for following up instalment fee payments on leases and licences, including the potential application of 10% penalty for failure to pay annual fees. This may include preparation and sending of notices for payment. Legal action is investigated and taken where appropriate (e.g. civil action).

### *Manage relationships with internal and external stakeholders*

- PIRSA Fisheries and Aquaculture manages a formal referral process with other government agencies, as required under the Act.
- PIRSA Fisheries and Aquaculture is often required to produce reports on state government and national levels which include data relating to leases and licences. Functions of reporting include use of information databases, collection and collation of data. Examples include reporting of lease/licence data in the annual South Australian Aquaculture Report (produced by PIRSA), and provision of data to ABARES, the National Native Title Tribunal and BDO Advisory Pty Ltd. Note that any data are provided under the provision of section 89A of the Act (relating to Confidentiality) which only allows for information to be provided to other agencies with the permission of the licence holder, if the individual is not able to be identified or if the information is required by an agency for the purposes of the proper performance of its functions.

### *Industry liaison (customer service)*

- Management of calls from licence holders regarding invoices, late payments, fees and general enquiries.
- PIRSA Fisheries and Aquaculture staff are encouraged to visit licensed aquaculture sites to understand operational constraints, the use of particular farming structures and engage with industry participants to ensure a relevant understanding of current practices and trends within the sectors of the SA aquaculture industry. This also improves communication channels between PIRSA staff and industry.

### *Production returns*

- Production returns are collected, collated and analysed for each aquaculture business, to enable adequate reporting of state and national economic information. Production returns that are not returned within set timeframes established under the Act or are deficient, are followed up in a timely manner by PIRSA Fisheries and Aquaculture to ensure adequate and accurate information can be used to inform decision-making, policy development, regulation and licence conditions.

## **2. Processing of lease and licence applications (including Pilot, Production, Research and Emergency Leases) – (Fee for Service<sup>1</sup>) (Pursuant to the Act and Regulations)**

### *New lease and licence applications*

- Provision of support to lease and licence holders in regard to completion of required forms and application information, including in regard to ATAB submissions and administrative requirements.
- Ensure new lease and licence applications meet the requirements outlined in PIRSA Fisheries and Aquaculture's zone policy requirements where applicable.
- Provision of support to lease and licence holders in regard to the submission of required forms to the State Commission Assessment Panel (SCAP) and/or relevant local government councils.
- Ensure the development of the terms and conditions of leases and licences address the interests of aquaculture operators, the environment and the broader community, in addition to adhering to the objects of the Act and other relevant legislation.

---

<sup>1</sup> Fee for Service activity refers to work undertaken by PIRSA to process applications submitted by individual companies relating specifically to their own activities. It does not include activities that are relevant to the whole industry sector.

### *Lease renewal*

- PIRSA Fisheries and Aquaculture coordinates a renewal procedure for aquaculture leases and corresponding licences. The procedure ensures that the Case Manager identifies if there are any legislative or technical requirements associated with an aquaculture activity that need to be addressed on the lease and/or licence.
- PIRSA Fisheries and Aquaculture also reviews adherence to lease performance criteria and regulatory requirements and determines the renewal period based on performance against these requirements. This includes provision of correspondence, resolving delinquent fees bank guarantees or insurance details, historical submission of returns and adherence to regulatory requirements.

### *Lease and Licence variation and substitution*

- PIRSA Fisheries and Aquaculture is to ensure that there is sufficient provision of information provided to lease and licence holders to enable the variations of existing leases and licences contemplated under the Act to occur. This includes the provision of application forms that collect suitable information for assessment of risks and the establishment of associated fees. Variations include:
  - a. New species addition.
  - b. Change of production system.
  - c. Movement of a site to a new location.
  - d. Sub-division of a site.
  - e. Amalgamation of two or more sites.
  - f. Transfer of a licence or lease.
  - g. Lease Conversion (i.e. pilot to production lease).
  - h. Surrender of a site.
  - i. Change to specified or nominated person.
  - j. One-off application to extend the term of a lease.

### *Licence ESD Assessment and Agency Referrals*

- PIRSA Fisheries and Aquaculture assess licence applications in a manner that ensures regulatory responsibilities for ESD under the Act are maintained.
- Referrals that are sent to the Environment Protection Authority (EPA) for approval, as legislated under the Act, contain accurate and adequate information to enable EPA staff to make a timely assessment of applications.
- Ensure accurate and adequate information is detailed in ESD assessment reports to enable compliance with other government agency policies and legislation, and as a part of ESD, ensure the concerns of key industry members, relevant government agency staff and interested stakeholders, including the community from public notification are addressed.

- Produce public submission response documents that clearly address community concerns, where applicable.
- Ensure ESD's are assessed for any aquatic biosecurity risks including threats to established industry and wild stocks of aquatic animals (refer Program 7: Environmental Monitoring and Management for ESD assessment development and Program 2: Aquaculture Leasing and Licensing for ESD implementation).
- Ensure information provided to the Department of Environment and Water (DEW) is accurate and adequate for DEW staff to make a timely assessment of aquaculture licence applications in light of the requirements of the *Coast Protection Act 1972*, *Marine Parks Act 2007*, *National Parks and Wildlife Act 1972*, *Crown Land Management Act 2009*, *Heritage Places Act 1993*, *Historic Shipwrecks Act 1981* and *Wilderness Protection Act 1992*.
- Ensure accurate and adequate information is provided to the State Commission Assessment Panel (SCAP) to make a timely assessment of aquaculture licence applications in light of the requirements of the *Planning, Development and Infrastructure Act 2016*.
- Ensure accurate and adequate information is provided to the Department for Infrastructure and Transport (DIT) to ensure concurrence for the proposal is obtained where appropriate in conjunction with the *Harbors and Navigation Act 1993*.

#### *Spatial Assessment of Sites*

- Ensure accurate coordinates of each lease site are maintained and reviewed are not in conflict with Aquaculture Exclusion Zones, Marine Parks, Aquatic Reserves, Shipping Channels, Seal and Sea Lion buffers, Conservation Parks, National Parks and Reserve buffers, proximity to other aquaculture activities, thereby addressing concerns from agencies, industry and the public.
- Ensure spatial assessment of proposed sites in a timely manner for efficient processing of applications.

## Outputs/Outcomes

# Legislation

## Program Summary

The administration of the Act is a core function of PIRSA Fisheries and Aquaculture. The stand-alone Act is unique to South Australia and provides evidence of the importance of aquaculture to the State. To support this industry, planning and management arrangements under this legislation should be regularly reviewed for relevance and coverage. Where gaps exist, it is PIRSA Fisheries and Aquaculture's role to assist in the development of appropriate legislation in consultation with industry and to ensure the legal framework allows for effective decision-making for industry and for government. This program facilitates the translation of administrative policy decisions into legislation, where necessary, and ensures that policies, procedures and guidelines are developed consistent with and to facilitate the operation of the Act and regulations. This program also works with and informs compliance and enforcement actions under the Act.

## Objectives

To ensure the Act is administered legally, effectively, transparently and consistently and remain up to date and relevant to manage industry practices.

## Activities

### 1. Administration of the Act and Regulations

Administrative decision-making under the Act is legally sound, within jurisdiction, consistent with Ministerial powers and functions under appropriate delegation and made on the basis of due consideration of relevant information. Appropriate delegations must be in force. Example decisions (not a complete list - interagency referrals; suspension/cancellation of leases and licences; compliance action to be taken by lease and licence holders; notifications and review of complex correspondence requiring information for the determination of applications under the Regulations.

Ongoing input and review of implementation of requirements of the Act and Regulations (legislative compliance) to continue to clarify and streamline regulatory requirements for the industry by rationalising the regulatory rules imposed on aquaculture lease and licence holders; and continue to improve the delivery of the objectives of the Act, including 1) the promotion of ecologically sustainable development of marine and inland aquaculture, 2) maximising the benefits to the community from the state's aquaculture resources, and 3) ensuring the efficient and effective regulation of the aquaculture industry.

### 2. Legal Services and legislative interpretation (sections 7 and 9 of the Act)

PIRSA Fisheries and Aquaculture provide strategic legal services for day to day administration of the Act and Regulations. Formal advice as to the Interpretation of the provisions of the Act, as amended, and associated Acts, Regulations and policies including requirements under the *Livestock Act 1997* and *Environment Protection Act 1993* is sought from either Parliamentary Counsel or the Crown Solicitor's Office (CSO), where required, before some decisions are made and proposed actions are taken.

Key internal processes, documents, instruments and correspondence are reviewed for consistency with Act and Regulations.

The coordination of advice and the preparation of contractual documentation for commercial and property transactions undertaken by PIRSA Fisheries and Aquaculture through the Crown Solicitor's Office is required to ensure compliance with legal and PIRSA policy responsibilities relating to contract law.

Input into applications made under the Freedom of Information Act (FOI).

## Outputs/Outcomes

	Deliverables	Due date
<b>1.</b>	<b>Activity 1 - Administration of the Act and Regulations</b>	
	<ul style="list-style-type: none"> <li>Implementation of informed and legally valid administrative decisions consistent with the Act to promote efficient and transparent government administration and industry development.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>Referral to and liaison with Parliamentary committees.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>Internal strategic, Crown and Parliamentary Counsel legal input into new internal policies, procedures, documents, correspondence, instruments and decisions under the Act as amended.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>Ongoing implementation of the requirements of and developments under the Act and Regulations.</li> </ul>	Ongoing

# Compliance Operations

## Program Summary

Compliance of the activities conducted on aquaculture sites with required legislative frameworks includes provision of due notice, monitoring and compliance activities by PIRSA Fisheries and Aquaculture staff and other related SA government agencies to ensure lease and licence holders comply with the Act, associated Acts, Regulations, policies and specific lease and licence conditions pertaining to their operations.

## Objectives

To maximise voluntary compliance through education and awareness programs and creating an effective deterrence through strategic monitoring and enforcement programs.

## Activities

### 1. Operational planning and implementation (Section 82 of the Act; Regulations 11, 12, 19)

Communication and monitoring activities are undertaken by PIRSA Fisheries and Aquaculture and related SA government agencies to ensure compliance by aquaculture lease and/or licence holders with legislation (Act, other Acts, Regulations and policies) and conditions of leases and/or licences.

Procedures and processes required for response to notifiable events (e.g., interactions with protected species, escaped stock, high mortalities) in an efficient and timely manner are developed and implemented by all agencies concerned.

Work is undertaken to strategically plan for compliance inspections to enable targeted inspection of high risk activities, in order to increase the overall efficiency of the compliance process.

### 2. Site Surveillance (Parts 6 and 7 and Section 82A of the Act; Regulation 25)

Site surveillance inspections are undertaken by Fisheries Officers to ensure lease and licence holders comply with the Act, associated Acts, Regulations, policies and specific lease and licence conditions, to investigate complaints from the public, or to ensure appropriate rehabilitation of surrendered or expired sites. Surveillance activities include:

- Site inspections are required to be undertaken by a minimum of two Fisheries Officers.
- Marine compliance inspections involve photographing and plotting the site markers to ensure compliance with lease and licence conditions and spatial description (includes compliance with navigational standards and lease performance criteria) of the site by Fisheries Officers.
- Reports made to PIRSA Fisheries and Aquaculture subsequent to compliance inspections outline any compliance issues with a site and include photographs and site waypoints.
- Follow up inspections are required for sites that have identified compliance issues. These inspections are carried out within a reasonable timeframe, with due consideration of the risks to other users of the waters or resource.

- Inspections are also undertaken on sites that have been or are due to be, rehabilitated by lease or licence holders or contractors of lease and/or licence holders on an as required basis.

Fisheries Officers respond to various reactive compliance issues that arise from reports by members of the public and other government agencies, from issues observed during environmental monitoring programs or from aquaculture lease and licence holders, in regard to operational infrastructure, interactions with protected species, aquaculture stock, marine debris, and possible disease outbreaks.

PIRSA Fisheries and Aquaculture Services follow up and may pursue further action including expiation of licence holders for failure to submit or incomplete annual EMP and Production Return reports.

Site inspections undertaken by Fisheries Officers will include visual inspection of sites, undertaking video footage, GPS location of infrastructure and condition of infrastructure and recording of data.

### **3. Aquaculture Compliance Liaison (Section 9 of the Act)**

PIRSA Fisheries and Aquaculture Policy Staff liaise with Fisheries Officers to assist with annual compliance planning activities, to provide information on conditions relating to individual lease and licence holders and existing aquaculture legislation and policy, to assist compliance field operations, investigations and other compliance activities. Policy staff also provide technical input to environmental compliance and the nature of aquaculture development and operation when addressing compliance related issues.

Policy staff also assist with collation of compliance data after the inspection process and supply lines of evidence regarding compliance outcomes if and when required.

## **Outputs/Outcomes**

### **All Activities**

- Maximise compliance with the Act, regulations and lease/licence conditions through education, deterrence and site inspections.
- Conduct appropriate investigations of reported and potential disease, fish kills or protected species interactions/entanglements.
- Provision of information to Fisheries Officers.
- Site inspections undertaken by Fisheries Officers. PIRSA Fisheries and Aquaculture Environment Program also assists and undertakes this work, which includes visual inspection of sites, GPS location of infrastructure, assessment of site appearance, recording of data. This may include travel to and from remote locations.
- PIRSA Fisheries and the Aquaculture Environment Program identifies possible abandoned sites through compliance inspections and through report follow ups. This includes desktop spatial analysis, field identification (including quantification of infrastructure, GPS marking of abandoned structures and photos) and identification of lease/licence holders through PIIMS database.

	Deliverables	Due date
1.	Activity 2 – Site surveillance (parts 6 and 7; Section 82A; Regulation 25)	
	<ul style="list-style-type: none"> <li>Undertake site inspections; ensuring licence holder compliance with licence conditions and requirements of <i>the Aquaculture Act 2001</i> and the Regulations.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>Timely communication of inspection outcomes to relevant licence holders, including identification of instances of both compliance and non-compliance</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>Undertaking re-inspections of non-compliant sites, including ongoing liaison with responsible licence holders</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>Undertaking inspections of sites due to be or that have been rehabilitated.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>Respond to information provided by members of the public or SA Government Agencies in relation to compliance issues relevant to the Abalone Sector.</li> </ul>	Ongoing

Note that due to the limited number of lease and licence holders in this sector and the low level of production, compliance activity in this area is significantly reduced. In the future further consideration will be required to determine the compliance program, should production in this sector increase.

# Aquaculture Systems

## Program Summary

Aquaculture Systems comprise of a range of key computer-based and manually operated tools to ensure that PIRSA Fisheries and Aquaculture operates in an efficient and effective manner. Activities under Aquaculture Systems include ensuring up to date IT systems are in place such as the Primary Industries Information Management System, Public Register and ArcGIS mapping software.

## Objectives

To develop, maintain and review systems to support management and administration of the aquaculture industry, in accordance with the Act.

## Activities

### 1. IT Systems management (Section 7, 9, 80 and 83 of the Act)

Successful delivery of services to the aquaculture industry is dependent upon the effective maintenance and management of IT systems. These include:

- State-wide Primary Industry Information Management System (PIIMS) database - PIRSA Fisheries and Aquaculture uses PIIMS to manage lease and licence holder information to ensure that accurate records are kept on all legal parties involved in aquaculture in South Australia, where the activities are occurring, the correct allocation of lease and licence conditions for each registration and for the management of transactions by Case Managers. PIIMS is required to create legal lease and licence instruments and to supply selected information held on the database to PIRSA Fisheries and Aquaculture's online Public Register (AgInsight).
- Public register – Maintaining a public register is a mandatory requirement under section 80 of the Act. PIRSA Fisheries and Aquaculture's Public Register online application (AgInsight) has been developed using Spatial Software tools that will provide a visual, interactive and printable display of aquaculture lease and licence sites and conditions (maintained in PIIMS).
- ArcGIS mapping software and layers – is used to spatially map all sites, to ensure these meet the requirements of various parameters including aquaculture zone policies (including exclusion zones), Conservation Parks, National Parks, Reserves, Seal and Sea Lion sites, Historic Ship wrecks locations, associated buffer areas and bathymetry. The spatial information is used to address concerns of other government agencies, industry members or public resource users. PIRSA Fisheries and Aquaculture engages with PIRSA Spatial Information Services to ensure that the spatial data collected and used to regulate aquaculture lease and licence information is up-to-date and operates with current software. The spatial data also updates the Aquaculture Public Register with both application and current site locations.
- In February 2020, a new geodetic datum system for coordinates (Geocentric Datum of Australia 2020 - GDA2020) replaced the current system (AGD94) and PIRSA Fisheries and Aquaculture will liaise with PIRSA Spatial Information Services to continue to ensure that lease and licence data integrity is maintained through the transition into the new system.
- Review, troubleshooting and ongoing maintenance of the on-line reporting system for electronic lodgment of annual EMP and production return reports (myPIRSA) by lease and licence holders.

- Microsoft Excel Databases – Information supplied to PIRSA Fisheries and Aquaculture from aquaculture lease and licence holders for Environmental Monitoring Program reporting and production return information is managed through the use of Microsoft Excel Databases. Production return data is analysed and summarised into a standard format to identify production of aquaculture products for the various aquaculture sectors in SA (for economic analysis).
- PIRSA Fisheries and Aquaculture utilises all available PIRSA systems and internal processes such as the Objective filing system, records management processes, email, intranet and website systems.
- Reporting from these databases is also required for external agencies on state government and national levels, so that trends in aquaculture development and management can be quantified.

Time is also spent liaising with PIRSA spatial and IT staff to rectify issues that may arise with databases, this also includes updates to systems and testing required when updates or upgrades are installed.

## Outputs/Outcomes

	Deliverables	Due date
<b>1.</b>	<b>Activity 1 - IT systems management</b>	
	<ul style="list-style-type: none"> <li>• Accurate and efficient systems are maintained and enhanced to provide for effective and efficient management and administration of the aquaculture industry, in accordance with the Act.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>• Provide for public transparency of use of the States aquaculture resources (e.g., Public Register is available on the PIRSA Fisheries and Aquaculture website for all stakeholders, including the aquaculture industry, relevant government Agencies and general public).</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>• To safeguard lease and licence holder details by adhering to broader government guidelines (e.g. records management requirements for public service document standards and freedom of information requests).</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>• Included in the management of the PIIMS database is assessing reporting functionalities, liaison with the PIRSA IT group, testing updates to the database, reporting of functional issues and troubleshooting with system users.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>• Included in the management of the Public Register system is rollout of updates, reporting of functional issues to the PIRSA IT group, testing when updates occur and troubleshooting with system users both internally and externally.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>• Included in the management of ArcGIS is the rollout of update software, appropriate training for use of the program, recognition, requests and testing for software fixes, liaison with the PIRSA spatial group, reporting spatial information and troubleshooting with system users.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>• Management of the Microsoft Database includes alignment of databases annually to reflect data requirements of Environmental Monitoring Reports.</li> </ul>	Ongoing

	<ul style="list-style-type: none"> <li>• Management of records management systems (e.g. Objective) may include testing of various functionalities, liaison with the PIRSA IT group and requests for further updates to systems and software.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>• Ongoing maintenance and troubleshooting of the electronic lodgement system (my PIRSA) for environmental monitoring program and production return data.</li> </ul>	Ongoing

# Aquatic Animal Health

## Program Summary

The Aquatic Animal Health program provides a range of services relating to the prevention, preparedness, and response to aquatic disease. The program is underpinned by science and risk-based management. In addition the program provides input to and alignment with broader state and national biosecurity policy.

## Objectives

To maintain the integrity of South Australia's aquatic biosecurity through prevention, preparedness and response strategies, the use of risk-based assessments and surveillance that aim to identify and manage the disease risks to industry and the aquatic environment associated with aquaculture stocks.

## Activities

### 1. Management of aquatic animal health risks and emergency response (Pursuant to the Act and the Regulations)

#### *Monitoring of aquatic animal health/biosecurity risks*

- PIRSA Fisheries and Aquaculture's aquatic animal health programs address the potential risk and occurrence of aquatic animal pathogens and diseases in relation to aquaculture stocks that are important focus for the aquaculture industry, its productivity and other users of SA State waters.
- Provide technical advice to industry on how to implement national Aquaculture Farm Biosecurity Plan guidelines: <http://www.agriculture.gov.au/fisheries/aquaculture/farm-biosecurity-plan>. Farm biosecurity provides the measures to minimise the risk and impact of disease.
- Assessment and management of biosecurity risks include particular attention to significant and notifiable diseases of abalone. These include (but not limited to) abalone viral ganglioneuritis (AVG), infection with abalone herpes-like virus, perkinsosis (*Perkinsus olseni* and other *Perkinsus* spp), and infection with *Xenohaliotis californiensis* (withering syndrome).

#### *Disease surveillance*

- Maintenance of a passive surveillance capacity to comply with Commonwealth disease reporting requirements. Information from surveillance allows PIRSA Fisheries and Aquaculture to determine what is occurring within a sector, what disease issues are of concern and allows identification of emerging disease issues.
- Coordinate active surveillance programs as determined or required by the Commonwealth.
- Provide advice to licence holders on industry based active surveillance programs.
- There is an ongoing requirement to develop suitable mortality guidelines with the abalone sector that adequately captures necessary data to identify trends in unusual mortality across the sector.

### *Site inspections and investigations*

- PIRSA Fisheries and Aquaculture staff monitor and investigate breaches of the aquaculture stock translocation requirements under the *Livestock Act 1997* and inappropriate use of chemicals in accordance with chemical approvals issued under the Regulations. Provide assistance to Biosecurity or the Commonwealth with regard to breaches of Australian Pesticide and Veterinary Medicine Authority (APVMA) permitted or registered chemicals. Investigation of breaches includes taking evidence and undertaking a site visit in conjunction with PIRSA Biosecurity Officers to determine the nature of the breach. Investigations may result in legal action or education of licence holders.
- PIRSA Fisheries and Aquaculture staff investigate unusual mortalities and suspected disease as per the reporting requirements under the Regulations. Investigations may include site visits to obtain information from the farmer, inspection of the stock register and the taking of samples for laboratory diagnosis. Investigations may result in assistance to the licence holder, administrative or legal action. Investigation of disease incidents and assistance for licence holders. If an investigation results in the detection of an infectious or notifiable disease, then this may initiate an emergency response led by Biosecurity.

### *Emergency response*

- PIRSA Fisheries and Aquaculture are responsible for the prevention and preparedness of aquatic animal disease incidents. This includes maintaining a capacity to deal with minor and major aquatic disease incidences reportable under the Regulations and the *Livestock Act 1997*. Emergency responses, are led Biosecurity. However, PIRSA Fisheries and Aquaculture would be closely involved during an emergency response.
- Assist Biosecurity in emergency response training as well as developing, reviewing and updating emergency response plans.

### *Processing of translocation and chemical use applications*

#### *Translocation applications*

- Provision of support to licence holders in regard to translocation applications.
- Ensure applications meet the requirements outlined in the *Livestock (Prohibition of Entry into and Movement within South Australia of Aquaculture Stock) Notice 2020* and PIRSA Fisheries and Aquaculture's internal procedures where applicable.
- Ensure the application and any conditions address the interests of aquaculture operators, the environment and the broader community, in addition to adhering to the objects of all relevant legislation.
- Ensure appropriate health certification and biosecurity protocols are provided where required and potential biosecurity risks are considered and evaluated (including State and National notifiable diseases), where necessary, in line with relevant risk assessments.
- Ensure required consultation with all applicable stakeholders (Interstate authorities, State government agency staff including Biosecurity SA, aquaculture industry, commercial and recreational fisheries and general public) is undertaken in a timely and efficient manner to ensure the application assessment process can be undertaken efficiently.
- Provide background and advice to the Chief Inspector of Stock or their Deputies where required for Ministerial Approval.

- Follow up on conditions of approvals as required and collate information where required. Maintain all relevant information and data in a central database.

#### *Chemical use applications*

- Provision of support to licence holders in regard to chemical use applications.
- Ensure new applications meet the requirements outlined in the Regulations and PIRSA Fisheries and Aquaculture's internal procedures where applicable.
- Ensure the application and any conditions address the interests of aquaculture operators, the environment and the broader community, in addition to adhering to the objects of all relevant legislation.
- Ensure appropriate veterinarian prescription and biosecurity protocols are provided, where required, and assessment of the environmental risks are evaluated. Where necessary, a risk assessment may be required.
- Ensure required consultation with all applicable stakeholders (interstate authorities including the APVMA, State government agency staff including Biosecurity and the EPA, industry veterinarian, aquaculture industry, commercial and recreational fisheries and general public as required) is undertaken in a timely and efficient manner to ensure the application assessment process can be undertaken efficiently.
- Where required, undertake a literature search and collate background information including efficacy, environmental and ecotoxicology research.
- Provide background to the Executive Director Fisheries and Aquaculture where required for Ministerial Approval.
- Follow up on conditions of approvals as required and collate information where required. This includes environmental monitoring data and information. Maintain all relevant information and data in a central database.

#### *Policy and Legislation*

- Develop, review and update aquatic animal health related policy and legislation as required.
- Implement the Regulations.
- Assist with implementation of an Emergency Lease guidelines, if required.

## **2. Provide Input to and alignment with broader state and national biosecurity policy frameworks, legislation and other processes (Sections 7 and 9 of the Act)**

#### *Disease surveillance reporting*

- States and Territories are required to regularly report the presence or absence of notifiable and significant diseases in their jurisdictional zone to the Australian Government. As a member country of the World Organisation of Animal Health (OIE), Australia contributes to the international reporting of OIE listed diseases of aquatic animals on a regular basis. Australia's active participation in the OIE aquatic animal disease reporting program provides historical evidence to substantiate Australia's claims of freedom from major diseases to support export certification and quarantine import policies.

### *Representation on Committees dealing with aquatic animal health*

- Sub-Committee for Aquatic Animal Health (SCAAH) provides scientific and technical advice on aquatic animal health/biosecurity issues to Animal Health Committee. SCAAH members represent the Australian, State and Northern Territory governments and the Commonwealth Scientific and Industrial Research Organisation (CSIRO) Australian Centre for Disease Preparedness (formerly Australian Animal Health Laboratory). Other aquatic animal health experts from both government and non-government agencies including specialists from academia, industry and the private sector - may also be invited to participate.
- Aquatic Consultative Committee on Emergency Animal Disease (Aquatic CCEAD) coordinates a national response to aquatic animal disease emergencies. This advisory committee is made up of the Australian Chief Veterinary Officer (CVO), representatives from the Australian Quarantine and Inspection Service and Biosecurity Australia, the CVO (or the Director of the fisheries department) in each State and Territory government, and the head of the CSIRO Australian Centre for Disease Preparedness. Technical representatives from industry are also included. The Aquatic CCEAD helps to ensure that the most effective technical response is implemented. PIRSA Fisheries and Aquaculture provides advice to the South Australian CVO and sits on the Aquatic CCEAD as needed.
- Advice and input for all aquatic issues dealt with by the CVO when representing South Australia at the Australian Animal Health Committee. AHC provides scientific and technical advice on animal health issues to Agriculture Senior Officials Committee (formerly the Primary Industries Standing Committee) via National Biosecurity Committee (NBC). Comprising Australian state and territory and New Zealand Chief Veterinary Officers and representation from CSIRO, Biosecurity Australia and Animal Health Australia, AHC drives and manages high level strategic policy development, operational strategies and standards for government in animal health, domestic quarantine, animal welfare and veterinary public health. AHC members also meet regularly to discuss issues of national importance.
- PIRSA Fisheries and Aquaculture regularly participates in committees and working groups whose objectives have a direct link to South Australian aquaculture industries. For example, the Aquatic Emergency Animal Disease Response Arrangement working group (under AHC which is exploring cost sharing agreements between industry and government in the event of any aquatic emergency animal disease incident. Other working groups include: Translocation working groups, the Biosecurity Plan guideline working group and the Aquatic Veterinary Medicines working group.

### *Representation to national regulators dealing with aquatic animal health*

- Advice and input for all aquatic animal health issues dealt with by state and federal authorities, including the APVMA when representing South Australian aquaculture industry sectors. PIRSA Fisheries and Aquaculture provides scientific and technical advice on animal health issues to underpin development of industry-wide scale chemical use.

## Outputs/Outcomes

	Deliverables	Due date
1.	<b>Activity 1 Management of aquatic animal health risks and emergency response</b>	
	Maintain the ability to deliver accurate and timely investigations for minor and major disease events (e.g. unexplained mortality event) and information to lease and licence holders to provide for appropriate response.	Ongoing
	Conduct appropriate investigations of reported suspected disease and fish kills.	Ongoing
	Site visits conducted by PIRSA Fisheries and Aquaculture staff to investigate issues identified by lease and licence holders, government and local government agencies and general public or other stakeholders.	Ongoing
	Ensure the maintenance and accuracy of PIRSA's passive surveillance database.	Ongoing
	Assist with or coordinate active surveillance activities as required, for example in response to disease threats or requirements from the Commonwealth to support trade and market access. For example, during 2019 the Commonwealth undertook an abalone disease surveillance program to support international trade and market access. PIRSA F&A coordinated the States surveillance efforts (for both fisheries and aquaculture), as well as undertook laboratory processing of samples and associated costs, and continue to provide substantial advice to the Commonwealth. This was over and above cost-recovered resources.	As required
	Support licence holders regarding translocation and chemical use applications.	Ongoing
	Translocation applications are processed, including biosecurity audits conducted as required to assist licence holders with livestock translocations (e.g. to meet import requirements of other jurisdictions).	Ongoing
	Ongoing liaison with applicant/licence holder where technical advice is required.	Ongoing
	Contribute to the implementation of the Regulations.	Ongoing
	Assist with implementation of an Emergency Lease guidelines document.	Ongoing
	Ongoing liaison with relevant government [e.g. Interstate authorities (APVMA, government veterinarians), Biosecurity, Environment Protection Authority (EPA)] and non-government agencies (Industry peak bodies).	Ongoing
	Referrals and liaison with other government and non-government agencies as required (e.g. EPA, DIT, AGD, SCAP, Industry).	Ongoing
	Investigate breaches of the aquaculture stock translocation requirements under the <i>Livestock Act 1997</i> and inappropriate use of chemicals in accordance chemical use approvals issued under the Regulations.	Ongoing

	Provide assistance to Biosecurity or the Commonwealth with regard to breaches of APVMA permitted or registered chemicals	Ongoing
2	<b>Activity 2 Provide Input to and alignment with broader state and national biosecurity policy frameworks, legislation and other processes</b>	Ongoing
	Provide technical advice to industry on how to implement national Aquaculture Farm Biosecurity Plan guidelines.	As required
	Review and update emergency disease response plans.	As required
	Develop, review and update aquatic animal health related policy and legislation.	Ongoing
	Provide scientific and technical advice on aquatic animal health/biosecurity issues to Animal Health Committee	Ongoing
	Participation in biosecurity committees related to the Abalone sector.	Ongoing
	Provide input to national policy developments to ensure alignment with South Australian considerations and priorities.	Ongoing
	Align South Australian legislation and disease response plans with national requirements.	Ongoing

# Environmental Monitoring and Management

## Program Summary

The Environmental Monitoring and Management programs are required for all licence holders to ensure that the environmental risks associated with the aquaculture industry can be adaptively managed, and the industry can operate in a sustainable manner. Information obtained as a result of environmental assessments and monitoring programs inform policy and planning decisions, and therefore must be derived from the best available information. If environmental issues arise, PIRSA Fisheries and Aquaculture are responsible for government response to such issues as the central point for the management of the aquaculture industry. This may include collaboration with external government departments, to ensure adherence to relevant environmental legislation.

## Objectives

To monitor and manage the environmental performance of the South Australian Aquaculture industry.

To ensure aquaculture policy, planning and assessment activities are informed by the best available scientific and environmental information.

To ensure risks to the aquaculture industry, posed by other uses of aquatic resources remain within acceptable limits.

To ensure that environmental issues are understood and responded to by the most efficient and effective means.

## Activities

### **1. Management of environmental monitoring programs (Regulations part 3; Regulations 22, 23 of the *Aquaculture Regulations 2016*)**

Ensure the sector specific EMPs are reviewed on a regular basis and are current to evolving industry practices and needs, actual and perceived environmental risks (i.e. industry, government agencies, general public etc.) and up to date technical information to ensure the ongoing sustainability of the SA aquaculture industry.

Ensure site specific EMP's are developed and regulated appropriately.

Ensure EMP information is collected by licensees, contractors or PIRSA officers in a timely manner, as per formal EMP frameworks and regulatory arrangements.

Ensure analysis of EMP data is undertaken by PIRSA Fisheries and Aquaculture in a timely manner to determine compliance with lease performance criteria, licence conditions, zone policy biomass limitations and the Act, its subordinate regulations, and other associated legislation and policies (refer Program 4: Compliance for taking action on noncompliance events identified).

Ensure EMP data collected is used to inform relevant decision-making processes (e.g. policy development, lease and licence renewals, regulation and licence conditions).

Ensure a public summary of EMP and other relevant information is collated by PIRSA Fisheries and Aquaculture for each sector within an appropriate timeframe and made publicly available to demonstrate

ongoing awareness and compliance with ESD directed by the Act for aquaculture activities within SA. The South Australian Aquaculture report is produced annually and is available on the PIRSA website.

EMP reports that are not returned within set timeframes established under the Act or are deficient in information submitted are followed up in a timely manner to ensure complete set of data is maintained for each licence holder. Correspondence and decisions regarding penalty may be required to be carried out thereafter.

## **2. Response to Environmental issues (Sections 7 and 82A of the Act)**

PIRSA Fisheries and Aquaculture staff monitor and investigate potential breaches of the Act, the Regulations or other relevant environmental legislation, based on random and targeted inspections, information received by the public, other government agencies and other stakeholders (including recreational marine resource users), in an efficient and timely manner. PIRSA Fisheries and Aquaculture aim to work in collaboration with the industry to address and rectify any environmental issues as they arise. Subject to the circumstances of any reported non-compliance, PIRSA will apply the most appropriate measures such as education of licence holders, changes in licence conditions, direction to carry out work or further enforcement action if required.

Under the Regulations licence holders are required to submit strategies for approval by the Minister to PIRSA Fisheries and Aquaculture relating to methods to mitigate the risk of stock escapes and adverse marine mammal/protected species interactions. Alternatively, a sector-based strategy can be developed and approved, against which all operators within that sector must comply. Should one of these events (escape or adverse interaction) take place PIRSA Fisheries and Aquaculture investigates the incident and determines whether the licence holder was in breach of their strategy and whether the strategy needs to be updated and resubmitted for approval.

## **3. Provide input to and alignment with State and National environmental policy, legislation and strategies (Section 7 of the Act)**

### *Broader Environment and Conservation Policy Initiatives*

- Ensure that representation of PIRSA Fisheries and Aquaculture activities and activities of the SA aquaculture industry within other government legislation, strategies and plans are reflective of each industry sector's actual environmental risk (not perceived environmental risk).
- PIRSA Fisheries and Aquaculture must also work with the SA aquaculture industry to ensure that technical inputs into other State legislation, strategies and plans are accurate and adequate.
- South Australia has particular natural advantages as a location for aquaculture operations and the SA aquaculture industry must be cognisant of these environmental factors to ensure there is stable and sustainable growth. It is therefore essential for PIRSA Fisheries and Aquaculture to provide a comprehensive legislative, regulatory and administrative framework to guarantee maximum access and use for industry while ensuring that the following sections of the Act (Section 4(1)a to c) are addressed through the Regulation and activities of the SA aquaculture industry
  - a. Natural and physical resources are maintained to meet the reasonably foreseeable needs of future generations (including adherence to *Environment Protection Act 1993*, *Environment Protection (Water Quality) Policy 2015*, *Coast Protection Act 1972*, *Heritage Places Act 1993*, *Historic Shipwrecks Act 1981* and *Aboriginal Heritage Act 1988*).
  - b. Biological diversity and ecological processes and systems are protected (including adherence to *Coast Protection Act 1972*, *Marine Parks Act 2007* and *National Parks and Wildlife Act 1972*).

- c. Adverse effects on the environment are avoided, remedied or mitigated (including adherence to the *Environment Protection Act 1993*).

#### 4. Identify research needs/opportunities for sustainable aquaculture planning and management (Section 9 of the Act)

Aquaculture related research produces information that can lead to new innovations and opportunities for industry development and to produce effective solutions to a range of challenges facing the SA aquaculture industry.

PIRSA Fisheries and Aquaculture to further develop projects under PIRSA Fisheries and Aquaculture and Fisheries and Research Development Corporation (FRDC) initiative called Innovative Solutions for Aquaculture Planning and Management from recommendations identified by the SA aquaculture industry, research providers, national/international innovation and research that will support the development of aquaculture in South Australia.

Address recommendations from SARDI scientists and other research agencies to ensure these are considered in the development of policies, regulations and licence conditions.

### Outputs/Outcomes

	Deliverables	Due date
1.	<b>Activity 1 - Management of environmental monitoring programs</b>	
	<ul style="list-style-type: none"> <li>EMP programs (annual and periodic) are tailored to monitoring the Abalone sector's key environmental risks through annual review.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>Licence holders provide the information required to submit EMP forms electronically.</li> </ul>	31 August 2022

	<ul style="list-style-type: none"> <li>Recommendations from research initiatives are implemented in an accurate and timely manner.</li> </ul>	Ongoing

# Program Management and Administration

## Program Summary

Program Management and Administration broadly outlines those activities relating to running the PIRSA Fisheries and Aquaculture Division. This includes financial processes, including cost recovery, human resource management, customer liaison, business and strategic planning, implementation and cross-agency relationship building and collaboration.

## Objectives

To ensure strategic goals of PIRSA Fisheries and Aquaculture are achieved and overall governance of PIRSA Fisheries and Aquaculture operations meet public sector standards.

## Activities

The following activities are undertaken by the Management and Administration Program:

### 1. Directorate (Section 9 of the Act)

Directorate activities provide a range of essential management and administrative services for support of PIRSA Fisheries and Aquaculture activities required by the Act, including:

- Providing strategic direction and leadership to deliver on PIRSA Fisheries and Aquaculture strategic goals.
- Establishing interagency agreements to support the efficient and timely endorsement of aquaculture leases and licences.
- Coordinating internal aquaculture program reports, administering external contracts and agreements.
- Ensuring that practices and procedures of PIRSA Fisheries and Aquaculture remain current and progressive in line with business developments and requirements of PIRSA, Government and industry and that reporting processes are maintained to support decision-making.
- Providing effective executive administrative support to PIRSA Fisheries and Aquaculture's Senior Management Team.
- Ensuring appropriate delegations under the Act and associated legislation are in place to support effective decision-making.

### 2. Human Resource Management and Administration (Sections 7 and 9 of the Act)

General Management and Administration activities ensure that all administrative tasks undertaken by PIRSA Fisheries and Aquaculture adhere to departmental and broader government policies and standards for human resource management, work, health and safety, customer service standards, records management and other specified policies as determined by PIRSA.

### *HR Management*

- Effective recruitment, selection, retention and ongoing management and development of staff within the PIRSA Fisheries and Aquaculture Division, in line with requirements of the *Public Sector Act 2009*.
- Effective management and development of human resources, including delegation of HR responsibilities.
- Promote operational efficiencies within PIRSA Fisheries and Aquaculture, whilst maintaining appropriate levels of responsibility, security and protocol for all staff.

### *Team/Divisional/Strategic Meetings*

- Effective management of divisional operations ranging from specific internal agency groups to whole divisional meetings where necessary.

### *WHS Management*

- PIRSA Fisheries and Aquaculture is required to align all WHS policies, actions and committees to meet State legislative requirements and PIRSA policies to ensure a safe working environment is provided for all staff to undertake their duties.

### *Define and develop customer service standards*

- Improve customer satisfaction with the services provided by PIRSA Fisheries and Aquaculture and to meet the SA Strategic Plan targets of an increase in the level of satisfaction of SA people with government services.

### *Participation in training, education and awareness programs*

- A broader awareness of the environment in which PIRSA Fisheries and Aquaculture operates, including other industries and government priorities, provides a greater depth of understanding which can be used to inform decision-making, or challenge current thinking to remain at the forefront of aquaculture planning and management.
- Ensure PIRSA Fisheries and Aquaculture staff understand and are aware of their responsibilities and remain abreast of the latest technical and business tools. This includes both formal and internal training of staff by mentors and peers.

### *Project management*

- To ensure all routine activities and special projects are undertaken in an efficient and effective manner.
- Ensure that reporting timeframes are kept by PIRSA Fisheries and Aquaculture staff.

## **3. Operational and Strategic Business Planning (Section 9 of the Act)**

Business Planning ensures that PIRSA Fisheries and Aquaculture has a vision, actions and goals that are consistent with the broader PIRSA direction, industry expectations, and the Strategic Planning for South Australia and supports the growth and innovation for the state's aquaculture industry.

PIRSA Fisheries and Aquaculture activities are aligned to the Strategic Planning for SA and PIRSA Strategic Directions, where appropriate.

Provide administrative support for statutory boards and committees (e.g., ATAB)

#### 4. Financial Management and Cost Recovery (Section 9 of the Act)

Finance and Budget Management ensures that all PIRSA Financial policies and procedures are adhered to in line with Treasury and Finance guidelines.

Ensure appropriate financial delegations are in place.

Effectively manage and implement the PIRSA Cost Recovery Policy (2019) to ensure a consistent and equitable process for the SA aquaculture industry.

PIRSA Fisheries and Aquaculture is required to regularly review existing cost recovery arrangements having regard to the full range of activities/ services provided to the SA aquaculture industry.

The principles underpinning PIRSA Fisheries and Aquaculture's cost recovery process must be aligned to the PIRSA Cost Recovery Policy (2019) and the 'Australia Government Cost Recovery Guidelines' report (2014)<sup>2</sup>, in addition to the Productivity Commission's 'Cost recovery by government agencies: inquiry report' (2001)<sup>3</sup>.

#### 5. Provision of timely advice to Chief Executive and Minister – PIRSA and other government agencies (Sections 7 and 9 of the Act)

Ensure that the Chief Executive of PIRSA and the Minister are aware of current and emerging issues faced by PIRSA Fisheries and Aquaculture and the SA aquaculture industry through the provision of relevant, accurate and timely advice.

Provide Ministerial Liaison services to the Minister's office.

## Outputs/Outcomes

	<ul style="list-style-type: none"><li>Management and development of human resources</li></ul>	Ongoing
	<ul style="list-style-type: none"><li>Develop, review and implement policies and procedures relating to administrative practices.</li></ul>	Ongoing
	<ul style="list-style-type: none"><li>Develop, review and monitor customer satisfaction standards and implement recommendations for improvement.</li></ul>	Ongoing

<sup>2</sup> Commonwealth Department of Finance and Administration (2014) Australian Government Cost Recovery Guidelines, July. <https://www.finance.gov.au/sites/default/files/2020-02/RMG-304%20Australian%20Government%20Cost%20Recovery%20Guidelines.pdf>

<sup>3</sup> Australian Productivity Commission (2001) Cost recovery by government agencies: inquiry report. Australian Government.

	<ul style="list-style-type: none"> <li>Accurate and timely project management and administration of external contractual services and agreements that are consistent with SA Public Service standards and legal obligations (e.g. tenders for rehabilitation of suspended aquaculture sites).</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>Develop, review monitor and implement PIRSA Fisheries and Aquaculture's budget and business plan.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>Demonstrated alignment of PIRSA Fisheries and Aquaculture strategies and actions with State plans and strategic frameworks.</li> </ul>	Ongoing
<b>2.</b>	<b>Activity 4 - Financial management and cost recovery</b>	
	<ul style="list-style-type: none"> <li>Develop, review and implement cost recovery procedures that are transparent, evidence-based and are developed in a consultative manner (e.g. develop PIRSA Fisheries and Aquaculture's Cost Recovery Framework).</li> </ul>	Ongoing
<b>3.</b>	<b>Activity 5 Provision of timely advice to Chief Executive and Minister – PIRSA and other government agencies</b>	
	<ul style="list-style-type: none"> <li>Accurate and timely advice is provided to the Chief Executive of Primary Industries and Regions, the Minister for Primary Industries and Regional Development and other Ministers.</li> </ul>	Ongoing

# Other Aquaculture Activities

## Program Summary

External Activities and Costs encompasses other processes that are undertaken by third parties and are these activities undertaken on an as required basis including economic and marketing research. All of this is undertaken to ensure decision-making, and management of aquaculture industry activities is consistent and based on complete and verifiable information.

## Objectives

To ensure effective engagement of external expertise to support PIRSA Fisheries and Aquaculture activities.

## Activities

### 1. Perform economic and production forecasting (Sections 9 and 83 of the Act)

PIRSA Fisheries and Aquaculture to determine the economic inputs the SA aquaculture industry is providing to SA and national economies in terms of direct and indirect employment, farm gate value, direct business turnover and flow on effects from processing, transport, retail and food sectors in alignment with PIRSA Strategic Directions. PIRSA Fisheries and Aquaculture engages a contractor to provide this service. A summary of these data is supplied to Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES), on an annual basis for collation of the Australian fisheries and aquaculture statistics report.

Economic analysis of the consequences from new legislative decisions recommended by PIRSA Fisheries and Aquaculture or other parties that can influence SA legislation and SA aquaculture industry practices is necessary to determine if there is potential to restrict industry development, limit the opportunity for competition in the marketplace or stifle industry innovation from these decisions.

### 2. Marketing Research (Section 9 of the Act)

Marketing analysis of the future trends of the industry including demand for products, impacts from changing financial markets and impact of Australian dollar value on the SA aquaculture industry are undertaken to address issues including identifying trade barriers to ensure policies, regulations and lease and licence conditions are consistent with future industry trends (e.g., production of PIRSA Fisheries and Aquaculture promotional material).

## Outputs/Outcomes

	Deliverables	Due date
1.	<b>Activity 1 - Perform economic and production forecasting</b>	
	<ul style="list-style-type: none"><li>Annual production of economic report (currently through BDO Advisory Pty Ltd) which is made publicly available through the PIRSA Fisheries and Aquaculture website.</li></ul>	Ongoing

	<ul style="list-style-type: none"> <li>Reporting to Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES).</li> </ul>	Ongoing
2.	<b>Activity 2 - Marketing research</b>	
	<ul style="list-style-type: none"> <li>Accurate and timely extension of recommendations from economic and marketing research to the Abalone industry sector.</li> </ul>	Ongoing
	<ul style="list-style-type: none"> <li>Representation of achievements of aquaculture in SA at national and international forums and conferences.</li> </ul>	Ongoing
